Dart 

## CERTIFICATION

Diplomo in full stack web development

ocean Academy, pudhucherry

Dec 2022 - May 2023

## SUMMARY

As a full stack **Python** developer, I have a wide range of skills and expertise in both front-end and back-end web development using Python. I am capable of creating visually appealing user interfaces using **HTML, CSS, and JavaScript**.

On the back-end side, I excel in using Python frameworks such as **Django** to build robust server-side logic. I can handle data storage and retrieval, manage APIs, and work with databases like **MongoDB**.

## PROJECT

### TODO APPLICATION

- Developed a robust and efficient todo application using **Python, Django, and MongoDB**. Implemented user authentication and authorization features for secure login and registration processes, ensuring data privacy and user account management.
- Utilized **MongoDB** as the backend database, optimizing data storage and retrieval for seamless todo item management. Ensured efficient performance and scalability of the application.
- Prepared comprehensive documentation to assist users in effectively utilizing the application's features. Provided prompt technical support to address any user inquiries or issues, ensuring a positive user experience.

## Technical Experience

### Frontend Development:

- Proficient in **HTML, CSS, and JavaScript** for creating responsive and visually appealing web interfaces.
- Experience with popular frontend libraries and frameworks such as React and Bootstrap.

### Databases:

- Proficient in working with **MongoDB, MySQL**, and performing database operations such as querying, updating, and data modeling.

### Version Control:

- Experienced in using Git and **GitHub** for collaborative development and version control.

### Problem-solving:

- Strong problem-solving skills with the ability to analyze and resolve technical issues efficiently.

### Learning Agility:

- Proactive and eager to learn new technologies and frameworks to stay updated with the latest industry trends.
